

Letter of Recommendation for Jason Ellison

To Whom It May Concern:

My name is Arthur Bishop, and I am the Senior Operations Engineer at Alabama Municipal Electric Authority (AMEA). I have worked with Jason Ellison over the past year on various projects as it relates to AMEA's data acquisition and network administration needs from Riviera Utilities.

Jason is very diligent in his work and is greatly concerned with cyber security as it relates to network administration. Jason was instrumental in making AMEA's VPN project successful from Riviera to AMEA, as well as giving advice and insight into making other Member sites communicate properly. He found security issues with the equipment that is being used and worked with the vendor to fix these issues. Jason is very adept at solving IT problems and working with all types of networking equipment.

In conclusion, Jason Ellison is highly qualified in both network administration and normal day-to-day IT duties. I believe that he will not only make a great addition to the City of Fairhope, but also a great support to AMEA as a contributing employee at one of our Member Cities.

I can be reached at my office (334-387-3508) or via email (art@amea.com) if you need any more information.

Thank you,

Arthur Bishop
